The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).</p>

 GEORGE ENG SUPERVISORY PATENT EXAMINER			

Continuation of 11. does NOT place the application in condition for allowance because: Regarding independent claims 1, 14, 17, and 20 Seo teaches a base station buffer that temporarily stores transmission data to be transmitted over a radio channel to a mobile station (see abstract and col. 4, lines 14-15, transmission data stored in base station buffer relates to a base station buffer that temporarily stores packets). Seo also teaches dynamically managing state transitions, including a suspend state, according to the size of transmission data stored in a base station buffer (see abstract, col. 4, lines 10-15 and FIG. 5), this relates to a suspend state when the base station buffer is empty because the state transitions in Seo are made according to any amount of data stored in the buffer. The claims make no mention of "the suspending of radio channel is performed irrespective as to a current state of a base station." Regarding claim 21 and 22 Ostman teaches a High-Speed control channel that is associated with a shared control channel (see paragraph [0011], this relates to a High-Speed Shared Control Channel.
